### KEY FEATURES

Full immersion electro-deposition coating inside and out for better corrosion protection.

Main spring specially coated with zinc phosphate base then e-coated for superior corrosion protection.

Self-guided pressure plate assures consistent alignment of spring providing super smooth operation and less wear.

Premium diaphragms feature high quality contaminate resistant rubber with nylon reinforced fabric tested well beyond the toughest industry specifications.

Designed High Vibration "HV" mounting base reduces vibration for longer life

Patented center seal with two self lubricating silicon o-rings provides the best possible leak protection for improved service life and lower maintenance costs.

All steel design provides durable, air tight center section that virtually eliminates leaks and structural failures

## WHO ELSE CAN OFFER YOU 3 YEAR WARRANTY ?

Prices may not be held after promotion offer ends. All prices subject to vat. Proof of purchase necessary for warranty terms and conditions apply
